

TKS-364 Thermo Test Probe

To extend the product range of thermo Test Probes, we have developed the series TKS-364 with integrated Pt100 thermo-element. The decisive advantage, which is achieved by the usage Pt100, is the possibility of direct connection to all common measurement instruments.

Receptacles of the series GKS-364 are recommended to ensure quick exchange of the Test Probe. With this, the Test Probe is compatible to the series GKS-364.

Technical Data:

- Recommended working stroke: 4,0mm
- Max. Stroke: 5,0mm
- Spring force at working stroke: 1,5N
- Temperature Application Range: -50°C to +180°C
- Plunger material: stainless steel
- Thermo sensor: Pt100
- Cable length: 2,0 m
 (AWG 26, Insulation PTFE)
