PASSION FOR FINEST TECHNOLOGY

Competence

FEINMETALL is your partner for the reliable contacting of electronic components. The wide range of applications for spring contact probes includes board tests with fine centers up to wire harness and connector tests with individual and intelligent solutions.

Innovative capacity

Since more than 60 years FEINMETALL represents a high level of innovation. Many patent-registered solutions have been milestones in the world of test engineering.

Broad competence in-house

The development and manufacturing of spring contact probes, special contact solutions and Semiconductor Wafer Test in one company are a wide basis for our competence in precision technology and micro-mechanics. This combination is unique at the market and represents "German Technology" at its best.

International customer service

We are acting in the international hightech industry and our processes are aligned accordingly. With nine subsidiaries worldwide and a strong network of well trained partners we are always connected to the markets and to our customers, wherever they are. Local stocks and special customs certificates provide a high delivery performance. (e.g. AEO - Authorised Economic Operator).

Quality

Quality controls all process steps at FEINMETALL. From product development and construction up to manufacturing and delivery all operation steps are perfectly aligned.

FEINMETALL is certified according to DIN ISO 9001. Additionally a wide range of measures like e.g. risk analysis by FMEA during the whole product development process ensure a maximum of technical as well as delivery reliability.

Environment and health protection

FEINMETALL is committed to the goals of the up-to-date legislation regarding environment as well as health protection and to conformance to all necessary measures. The current statements regarding the various European environment and health regulations are available on our homepage.

Customer focus

Our engineers and technicians work closely together with our customer and have a deep knowledge of the practical applications. Our know-how is your advantage!

FM Choice

What is FM Choice?

FM Choice is our specially curated selection of the most reliable and frequently used probes in the market. Based on our expertise and experience, we have pre-selected the top-performing probes, so you don't have to choose from hundreds of options. With FM Choice, we make your decision easier by offering the most trusted solutions that meet your needs.

One of the greatest advantages of FM Choice is high availability and fast delivery, as we can often ship directly from our stock. This enables us to meet your demands whenever you need them. Plus, FM Choice offers competitive pricing, even for smaller quantities, making it an attractive solution for all kinds of projects.

Our portfolio includes over 700 contact probes for pitches between 6 and 100 mil, covering a wide range of applications and ensuring we meet most technical requirements quickly and efficiently.

Benefits at a glance

Most trusted solutions

Competitive prices

Fast delivery & high availability

Discover FM Choice products online

With our new Product Finder, we offer you a complete overview of all FM Choice products that you can easily search through. This high-performance tool allows you to search for specific products and compare them based on their technical features.

In addition to the FM Choice products, we invite you to explore the other categories to discover our complete product portfolio. Start your selection now and experience the variety and quality of our products.

ELECTRICAL INFORMATION

Electrical conductivity

In a contact probe the primary current flow typically leads through the plunger, the barrel and the receptacle. A secondary current flow leads through the plunger, the spring and the barrel. The transition points cause certain transfer resistances that are influenced by the following factors:

- Conductivity of the base material
- Conductivity of the plating material
- Condition of the surface of the probe
- Size of the contact surface
- Contact forces at the transition points

FEINMETALL is taking measures to guarantee a constant low contact resistance during the whole lifetime of the probes. The maximum continuous currents (referred to the FEINMETALL standard high current test) and the typical resistances of each probe are shown in the data sheets. A pulse current can be higher depending on pulse and rest time, cooling and various other influences.

Max. Operating voltage

Voltmeters must always be connected in parallel with the electrical device or component on which the voltage is to be measured. This is necessary in order to measure the voltage applied to this component, because for the parallel connection the voltage in both branches is the same.

If the user operates our probes with a higher voltage than defined by DIN VDE 0100, part 410 as low voltage not dangerous to touch, *FEINMETALL does not assume any liability. Furthermore, the user himself is obliged to determine and implement the legally required protective measures for people and equipment.*

Temperature operating range

Depending on the electrical load, self-heating occurs as a result of power loss. The permissible environmental temperature decreases accordingly (derating). Exposure to additional loads such as high humidity, rapid and extreme temperature changes (thermal shock) and extreme loads (e.g. far above nominal travel) can lead to a shortened lifetime. For high current applications where temperature can rise up to +200°, our Feinmetall High current products are designed to withstand this challenge and remain constant performance.

Electrical protection class

According to VDE0100 part 410, our probes are only to be operated with low voltage that is not dangerous to touch (25 V rms AC, 60 V DC). These values include all occurring surge voltages, e.g. due to overvoltage, switching peaks, etc.

If the user operates our probes with a higher voltage than defined by DIN VDE 0100, part 410 as low voltage not dangerous to touch, FEINMETALL does not assume any liability. Furthermore, the user himself is obliged to determine and implement the legally required protective measures for people and equipment.

Dielectric / electric strength of bipolar probes

The dielectric strength (usually stated in kV/mm) of an insulator is the maximum electric field strength that may prevail in the material (including air) without a voltage breakdown (arc or spark) occurring. The creepage distances must be much longer, especially when exposed to dirt and moisture. The dielectric strength depends on the geometry of the probe, the material (dielectric), the ambient conditions and the degree of contamination. This comes into play in all our products with electrically insulating functions, e.g. switching probes, switching receptacles, combination receptacles, coaxial probes and insulating caps.

TOPIC OVERVIEW

Circuit Board Testing

We offer all commercially available ICT/FCT probes for Circuit Board Testing. We also provide an innovative solution for challenging test conditions with our PROGRESSIVE series.

Solar Wafer Testing

We offer special probes with an extended service life and particularly low resistances for contacting busbars on Solar Wafers.

Interface Solutions

FEINMETALL offers all Interface Solutions needed for secure test signal transmission, including blocks, probes, and rigid pins.

Flying Probes

Our portfolio's probes, hallmarked by high precision and low resistance, are compatible with the market's common test systems.

INTERFACE PROBES

INTERFACE SOLUTIONS

PRODUCT NAME

Number code system probes

In order to improve the clarity of the material designations, the self-explanatory number code has been further developed. Therefore, all Basic Contact Probes have been redefined according to the order code shown below.

Material Plunger

- B = BeCu (Beryllium Copper)
- P = Palladium alloy
- S = Steel

Diameter

- 090 = 0.90 mm

Plating Plunger

- G = Gold plating
- L = Longtime gold plating
- N = Nickel plating
- U = Unplated
- P = Functional plating progressive series
- R = Rhodium plating
- S = Silver plating
- LX = Anodizing
- M = Multiplex gold plating

Spring force

- 300 = 300 cN

Special Version

- L = Long version
- S = Short version
- H = High temperature version
- HP = Progressive series
- IK04 = Insulation cap 0.4 mm distance

Optional Length

- L = Long version
- S = Short version
- E21 = Projection height 21 mm (e.g.)

PRODUCT NAME

Number code system receptacles

In order to improve the clarity of the material designations, the self-explanatory number code has been further developed. Therefore, all receptacles have been redefined according to the order code shown below.

Connection

CR = Crimp
LA = Solder
WW = Wire wrap
WR = Round pin
WL = Wireless

Pin Length

10 = 10.0 mm

Press ring position

2.0 = 2.0 mm
7.6 = 7.6 mm
10.0 = 10.0 mm

Special Version

AT = Air tight
RD = With knurl
S1 = Special version 1

FLYING PROBES

PRODUCT NAME

Number code system

In order to improve the clarity of the material designations, the self-explanatory number code has been further developed. Therefore, all Flying Probes have been redefined according to the order code shown below.

Material Plunger

B = BeCu (Beryllium Copper)
P = Palladium alloy
S = Steel

Spring force

150 = 150 cN

Diameter

015 = 0.15 mm

Special Version

L = Long version
S = Short version
H = High temperature version
HP = Progressive series
M = Thread (e.g. M1.6×0.35)

Plating Plunger

G = Gold plating
L = Longtime gold plating
N = Nickel plating
U = Unplated
P = Functional plating progressive series
R = Rhodium plating
S = Silver plating

Projection height

E21 = Projection height 21 mm (e.g.)
S = Short version
L = Long version

FL100

PRODUCT NAME

Number code system

FEINMETALL interface blocks (Pylon blocks) are used as internal interface. The integrated spring contact probes guarantee a good signal transmission with low transfer resistances. This is only a selection of available signal blocks, further variants on request.

Mounting side

- B = Both side possible
- F = Fixture side
- R = Receiver side

Max. possible contacts / poles

- for example:
- 001 = 1 Pole
 - 030 = 30 Pole
 - 085 = 85 Pole
 - 170 = 170 Pole

Block type

- SB = Signal block
- HF = High frequency block
- HS = High current block
- PB = Pneumatic block
- BB = Blind block

Equipped contacts / poles

- for example:
- 001 = 1 Pole
 - 030 = 30 Pole
 - 085 = 85 Pole
 - 170 = 170 Pole

Connection

- CR = Crimp
- LA = Solder
- WW = Wire wrap
- WR = Round pin
- WL = Wireless

May deviate from the maximum possible contacts.

Variation

- 01 ... 02...
- Continuous number for different insertion of receptacles, pins or contact probes.

ASSEMBLY & MAINTENANCE

FEINMETALL offers a full selection of tools and accessories designed specifically for assembly and maintenance of Contact Probes and receptacles. These tools and accessories ensure effective installation and flawless contact functionality.

Insertion tool for plugable contact probes

For inserting the probe into the receptacle tool FDWZ is helpful. After the probe is pushed into the receptacle and stopped by the pressure marks, the probe is driven into the receptacle with the FDWZ tool. The tool is made of a synthetic material to avoid any damaging of the plunger tips. Depending on the design of the contact probe, the tool can also sit on the collar of the probe.

Order code	Product name	Length [mm]	Shank Ø [mm]
1052633	FDWZ-039	67.5	A-Ø=1.0; I-Ø=0.55
1003576	FDWZ-050	100.0	1.5
1003587	FDWZ-075	100.0	2.5
1003566	FDWZ-100	100.0	3.5
1020967	FDWZ-500	100.0	A-Ø= 6.0; I-Ø= 4.1

INSERTION TOOLS

Insertion tool for receptacles with fixed stop

All receptacles with dead stop (collar) can be inserted with tool FEWZ-...E0. Press ring at receptacles can be used also as dead stop. The guiding pin of the tool helps to stabilize and properly mount the receptacle.

Order code	Product name	Pin Ø [mm]	For receptacle
1000180	FEWZ-040E0	0,63	H040
1014313	FEWZ-050E0	0,80	H050, H787
1014311	FEWZ-075E0	0,90	H075, H703, H701
1014264	FEWZ-100E0	1,30	H100, H585, H502, H708
1054103	FEWZ-109E0	0,50	H109
1003643	FEWZ-511E0	0,60	H111, H511
1005041	FEWZ-563E0	2,00	H563
1003640	FEWZ-772E0	1,60	H772
1003642	FEWZ-774E0	2,60	H774, H566

Insertion tool for receptacles with press ring

All receptacles with press ring can be inserted with tool FEWZ-...Ex. In this case the x is the fix height level (see picture). This value is required for ordering the correct tool. For often changing projection heights the variable tool below is recommended.

Order code	Product name	Insertion depth [mm]	For receptacle
1093953	FEWZ-111E25	2.5	H111-2.5
1018382	FEWZ-075E46	4.6	H075
1000746	FEWZ-075E65	6.5	H075
1014311	FEWZ-075E76	7.6	H075
1080358	FEWZ-100E10	1.0	H100
1014268	FEWZ-100E36	3.6	H100
1014265	FEWZ-100E46	4.6	H100
1001274	FEWZ-100E50	5.0	H100
1014602	FEWZ-100E53	5.3	H100
1014266	FEWZ-100E55	5.5	H100
1015433	FEWZ-100E67	6.7	H100
1014267	FEWZ-100E76	7.6	H100

Variable insertion tool for receptacles

For different height levels of the receptacles with inserted press ring, the tool FEWZ-...EV is recommended. The required height level can be adjusted at the tool..

Order code	Product name	Insertion height [mm]	For receptacle
1008393	FEWZ-050EV	0 - 10	H050; H787
1008325	FEWZ-075EV	0 - 12	H075
1008392	FEWZ-100EV	0 - 12	H100
1008394	FEWZ-772EV	0 - 10	H772

With the removal tool, receptacles can be removed from a bore without damaging it. This is also possible with broken receptacles or if you do not have the possibility to knock the receptacles out from the back.

FZWZ-SET-001

1031070 - Removal tool for receptacles with basic equipment

Assembly

- 01 - Handle (GSFZWZ)
- 02 - Thread insert (BZ)
- 03 - Guiding sleeve (HZ)
- 04 - Screw-nut

Below you will find step-by-step instructions for handling the tool.

FK50

Spring force gauge up to 50N

The Spring Force Gauge allows force measurement at all types of spring contact probes up to 50 N.

This instrument allows in a very simple way to verify, if a probe is still intact and to determine the spring force of the probe. The measuring results are displayed at the instrument and the display can be electrically turned by 180° if needed, e.g. for overhead applications. For the measurement just put the measuring sleeve over the probe and push it to the mounting plate.

The sleeves depth can be adjusted according to the projection height of the probe. Adjustable measuring sleeves are available with three different diameters.

Technical specifications

Minimum force	3g / 0,10oz / 0,03N
Resolution	1g / 0,03oz / 0,01N
Measuring accuracy	+/- 0,5% at 25°C
Data output	via RS 232 (order code 2111810)
Power supply	6 x 1,5V AA (UM-3 batteries) (Batteries non included in delivery)

Included in delivery

1x Spring Force Gauge with receptacle for measuring sleeve
1x Measuring sleeve Ø 5,0mm
1x Calibration certificate
1x Carrying case

Accessories

1041981	MS300	Measuring sleeve Ø 3 mm
1041978	MS400	Measuring sleeve Ø 4 mm
1041979	MS500	Measuring sleeve Ø 5 mm
1003566	2111810	Data cable RS232

Order code	Product name
1147834	FK50-SET-001

Series drawing

All measurements are in mm.

Operating manual available on request. Further rigid measuring sleeves with different diameters and fixed projection height are available on the homepage.

Example for adjustment at measuring sleeve

	Projection height of probe (e.g. F732)	=	10.5 mm
	Nominal travel	=	4.0 mm
	Projection height - Nominal travel	=	10.5 mm - 4.0 mm
	Value of height to fix	=	6.5 mm

FIND US ONLINE

Our website

Welcome to the digital world of FEINMETALL. We offer you innovative contacting solutions that exceed your expectations. Visit our website at [FEINMETALL.com](https://www.feinmetall.com) and be inspired by the wide range of services customized to industry-specific needs. By using innovative technologies and advanced manufacturing methods, we deliver products of the highest quality and precision that can be used in various industries such as automotive, electronics, aerospace and medical. Our dedicated team is on hand to understand your requirements and help you find the best solutions to your challenges.
